INTRODUCTION

1. GENERAL

The Army Service Forces Medical Supply Catalog lists the items that are stored and issued by the Medical Department. It establishes the official item designation for use in the preparation of requisitions, records, reports and correspondence concerning medical supplies.

2. SECTIONS OF THE MEDICAL SUPPLY CATALOG

a. Med 1—Introduction.—This is an explanation of all sections of the Medical Supply Catalog, including the sections published as separate pamphlets as well as those included in this volume.

b. Med 2—Index.—The Index to the Medical Supply Catalog is a directory of the publications comprising the entire Medical Supply Catalog system.

c. Med 3—List of Items for Troops, Posts, Camps and Stations.—This section supersedes the Classes 1 to 9 inclusive, supplements thereto, and the Index of the former Medical Department Supply Catalog. For further information consult paragraph 1 of MED 3.

d. Med 4—Allowances of Expendable Supplies.—This section is published as a separate pamphlet and supersedes War Department Circular No. 26, Office of The Surgeon General. It prescribes the basic allowances of expendable medical supplies not otherwise authorized and supplements Tables of Equipment and Tables of Allowances for all arms and services.

e. Med 5—Stock List of All Items.—No publication under this number is contemplated, as the information is contained in MED 3.

f. Med 6—Sets.—Small Assemblies, Kits and Chests. This section supersedes the Appendix of the former Medical Department Supply Catalog, and lists component items of sets, kits, etc., issued by the Medical Department. Blank forms previously listed in the appendix are no longer included in this section. They are now listed in Section VIII, War Department Pamphlet No. 12-3, dated 24 March 1944, entitled, "List of Forms Stocked by Adjutant General Depots," and will be requisitioned as required from The Adjutant General in accordance with paragraphs 3 and 4, AR 310-200.

g. Med 7—Organizational and Higher Echelon Spare Parts.—This section is a series of pamphlets listing spare parts, replacement parts, special tools, accessories, etc., requiring frequent replacement. These parts are furnished with or are available on requisition for certain major items of equipment as authorized for each echelon of maintenance.

h. Med 8—Higher Echelon Spare Parts.—No publication is contemplated under this number, as this information has been included in MED 7.

i. Med 9—List of All Parts.—This section will consist of a series of pamphlets listing all component parts of selected Medical Department items. Each pamphlet will list all the parts necessary for the assemblage and maintenance of a major item, and will also indicate the authorized allowances of spare parts, tools, accessories, supplies, etc., to be issued with or for the item. Illustrations will be shown to identify the parts and indicate their relation to the complete assembly.*

j. Med 10—Medical Department Equipment Lists.—The pamphlets in this series list the equipment of hospitals and other medical units. Because of the many items involved, it is not feasible to designate the component items in

* In preparation; initial distribution will be made upon completion.

432593

Tables of Equipment or other publications. Equipment lists for medical units of similar function will be bound in one set, a separate set being published for each such group of units.

3. DISTRIBUTION OF THE MEDICAL SUPPLY CATALOG

The initial distribution of Catalogs and Catalog Changes to using units and installations will be automatic, in accordance with The Adjutant General's standard procedure. Additional copies of the Catalog and its components will be requisitioned as required from The Adjutant General in accordance with paragraphs 3 and 4, AR 310-200, and not, as in the past, from the St. Louis Medical Depot. For information concerning the distribution of the MED 10 series see MED 10-1, Instructions for Use of Equipment Lists, which will be issued automatically to all units entitled to any pamphlet in the MED 10 series.

4. NONSTANDARD ITEMS

The addition of many new standard items to the Medical Supply Catalog has decreased the necessity for the use of nonstandard items. The items now listed include those generally recognized as essential to medical practice and recourse to nonstandard items will rarely be necessary. Medical officers may find that, a compound which they frequently prescribed in civilian practice is not included in the Catalog. However, items have been included which serve the same purpose. Standard or nonstandard supplies required in emergency to save life or prevent suffering may be procured and vouchered to distribution depots under the provisions of AR 40-1705. Requisition-editing offices have been instructed to disapprove all requests for nonstandard items other than repair parts unless an exceptional need has been shown. Questionable cases will be referred to The Surgeon General, Attention: Distribution and Requirements Division, Supply Service, for decision.

LIST OF ITEMS FOR TROOPS, POSTS, CAMPS AND STATIONS

1. EXPLANATION AND USE OF MED 3

a. The section MED 3, "List of Items for Troops, Posts, Camps and Stations," supersedes that portion of the former Medical Department Supply Catalog comprising Classes 1 through 9 inclusive, Supplements thereto, and the Index. It will be observed that in effecting this change in the catalog system, some deviations from previous arrangement have been adopted, notably as cited below:

The supplemental drug items formerly listed in Class 1K and the biological stains formerly numbered from 15200 to 15440, inclusive, have been renumbered as Class 1 or Class 9 items and placed in proper alphabetical sequence. The designation "Certified" following certain biological stains indicates that the item is certified by the Commission on Standardization of Biological Stains.

The items formerly designated as "Issue While in Stock," and catalogued in a separate section, have either been deleted by publication of official catalog changes or reclassified and reinstated in numerical order.

b. Column arrangement in MED 3.

(1) Item Number Column.—Each item in MED 3 is designated by a seven-digit number. All seven digits will be used in requisitions, correspondence, shipping documents, and publications.

(2) Notes Column.—The symbols used in this column are defined as follows:

X—Item is expendable within the meaning of AR 35-6620. Items not bearing this symbol are non-expendable.
B—Item is inflammable.
C—Item is subject to damage by freezing.
D—Item must be frozen for preservation.
E—Item requires normal refrigeration for preservation (35-50° Fahrenheit).
N—Production limited; to be issued until stock is exhausted.
(1) Item is deteriorating.
(2) Refer to MED 6 for components.
(3) Requisition must give sufficient data, such as size, type, manufacturer, or serial number of part so that the depot can issue or purchase the correct item.
(4) Requisition must state voltage, current (AC or DC—if AC, cycle and phase), or type of gas, steam, etc.
(6) Item is an alcohol or narcotic within the meaning of AR 40-1705.

(3) Nomenclature and Description Column.—The item nomenclature and description is revised in many instances for the purpose of obtaining greater clarity and uniformity. Where applicable, the quantity contained in the packaged unit is indicated in the item nomenclature by Arabic numerals preceding the colon. The nomenclature on requisitions should include only the wording which appears before the colon.

(4) Unit Column.—The data appearing in the unit column has been revised to show the type of package or container in which the item is ordinarily packed, when this information is applicable. The number of items in the container, as for example, the number of pills in a bottle, is indicated in the nomenclature of the item. Variation in the type of container in which the item is ordinarily packed does not affect the status of the item; nor does the designation of less than the unit package quantity for purposes of inclusion in a kit, chest, or other assembly as published in MED 6, affect the status of the item.

(5) Unit Price Column.—The prices shown in this column will govern in all cases of charges

on payrolls, reports of surveys, transfers, inventories, requisitions and shipping tickets, except those resulting from a claim against a contractor or carrier of materials from a contractor's plant, in which event the contract price will govern.

(6) Replacement Rate Columns.—The figures in these columns represent average rates of consumption for the majority of expendable items. In certain other cases the designation "as req'd" (as required) indicates that requisitions should be based on actual need alone. The Replacement Rate figures *indicate the normal rate* of consumption per 1,000 men per month, but are not to be interpreted as either limiting or authorizing replacement in accordance with the rate shown. The figures in the Zone of the Interior (ZI) column are presented for the information and guidance of organizations and installations in accordance with TM 38-220, "Stock Control Manual for Posts, Camps and Stations." The figures in the Theater of Operations (T of Opns) column are presented for the information and guidance of theaters where experience does not provide a satisfactory basis for requisitioning.

(7) Status Column.—The status of all items in MED 3 is designated in accordance with the provisions of AR 850-25. The symbols appearing in the status column are defined as follows:

S—*Standard Item.* Items so designated are Standard Medical Department articles within the meaning of AR 850-25.

SS—*Substitute Standard Item.* Items so designated are Substitute Standard Medical Department articles within the meaning of AR 850-25. Notes in the Replacement Rates columns opposite Substitute Standard items indicate the Standard items for which their issue is authorized.

LS—*Limited Standard Item.* Items so designated are Limited Standard Medical Department articles within the meaning of AR 850-25.

MEDICAL SUPPLY CATALOG

LIST OF ITEMS FOR TROOPS, POSTS, CAMPS AND STATIONS

HEADQUARTERS, ARMY SERVICE FORCES · DECEMBER 1944

HEADQUARTERS, ARMY SERVICE FORCES,
WASHINGTON 25, D. C., 30 December 1944.

The material comprising Change 3 to Army Service Forces Catalog MED 3 consists of two sections, as follows:

a. Section I. This part consists of changes in established classes in MED 3.

b. Section II. This section is a new class for insertion in MED 3 between Class B and Class P. This new group of items has been designated as "Class H," and covers orthopedic shop equipment and supplies which have been standardized for storage and issue by the Medical Department. Although these item numbers are prefixed by the letter "H", they are to be treated in every respect as standard seven-digit numbers. Where applicable, the former nonstandard item number is shown for each item directly under the new standard number, and any depot stock carried under the former nonstandard number, as well as any stock on hand in stations being carried as nonstandard, will be picked up under the new standard item number. Orthopedic shop equipment and supplies will be requisitioned in accordance with new Equipment List, ASF Catalog MED 10–22.

MEDICAL SUPPLY CATALOG

LIST OF ITEMS FOR TROOPS, POSTS, CAMPS AND STATIONS

HEADQUARTERS, ARMY SERVICE FORCES • JANUARY 1945

WAR DEPARTMENT
WASHINGTON 25, D. C., 20 January 1945

1. The material comprising Change 4 to Army Service Forces Catalog MED 3 is composed of two sections, as follows:

a. Section I. This part consists of changes in established classes in MED 3.

b. Section II. This section is a new class for insertion in MED 3 between Class B and Class H. This new group of items has been designated as "Class F," and covers occupational therapy equipment and supplies which have been standardized for storage and issue by the Medical Department. Although these item numbers are prefixed by the letter "F," they are to be treated in every respect as standard seven-digit numbers. Where applicable, the former nonstandard item number is shown for each item directly under the new standard number, and any depot stock carried under the former nonstandard number, as well as any stock on hand in stations being carried as nonstandard, will be picked up under the new standard item number. Occupational therapy equipment and supplies will be requisitioned in accordance with new Equipment List, ASF Catalog MED 10–23.

2. Items marked "X" in the "Notes" column are expendable.

MEDICAL SUPPLY CATALOG

LIST OF ITEMS FOR TROOPS, POSTS, CAMPS AND STATIONS

HEADQUARTERS ARMY SERVICE FORCES • JUNE 1945

INTRODUCTION

1. The material comprising Change 6 to Army Service Forces Catalog MED 3 is composed of two sections, as follows:

a. Section I. This part consists of individual item changes in established classes of MED 3 other than Class B.

b. Section II. This section is a revision of Class B which supersedes the edition of that class included in ASF Catalog MED 3, Change 1, 19 September 1944. All changes on books included in Changes 2 through 5 to MED 3 have been incorporated in this revision. In addition, a number of changes not heretofore published have also been effected. Each of these latter changes has been indicated by a symbol preceding the item number; explanation of the symbols is given in the key at end of the class.

2. In the many instances where corrections in date and edition number are shown, without change in item number, there is no intention to change the edition from that currently being procured and issued. These changes are for the purpose of obtaining an accurate title listing which will be in conformity with stock on hand and in use.

3. One item, former B399031, has been deleted, since what was listed as a 1944 edition was actually a 1944 reprint of the 1935 (1st) edition as represented by item number B399030. Any stock carried under B399031 should be transferred to B399030.

4. One item, B399529, has been added with a Limited Standard classification to provide an item number to cover the 1943 edition of the Year Book of Neurology, Psychiatry and Endocrinology.

Key to Disposition of Items Deleted:

(*a*) *Obsolete.* Posts, camps, and stations in zone of interior will report quantities on hand to depot commander of their respective distribution depot. Depot commanders will declare as surplus in accordance with the provisions of ASF Manual M416.

(*b*) *Discontinued.* Use of carbon dioxide for therapeutic purposes has been prohibited under the provisions of WD Technical Bulletin MED 1–31, hence item will no longer be required by the Medical Department. Since the Corps of Engineers has primary storage and issue responsibility for this item, depots in zone of interior will transfer stocks on hand to Account 98, under present item number, and request disposition of these stocks, plus all quantities which have been declared surplus, in accordance with instructions of Part Two, section IV, paragraph 2*b*, ASF Circular No. 286, 1944. Posts, camps, and stations in zone of interior will take action as prescribed in Part Two, section IV, paragraph 2*a*, ASF Circular No. 286, 1944.

(*c*) *Storage and issue responsibility assigned to Quartermaster.* In lieu of 9928000, Quartermaster item 65–J–1911–50, Heater, Immersion Type, for Cans, Corrugated, will be furnished by the Quartermaster to authorized units as provided in applicable Tables of Equipment. Depots in zone of interior will transfer stocks of 9928000 to Account 98, under present item number, pending receipt of instructions for disposition from Redistribution and Salvage Branch, SGO.

KEY TO DISPOSITION OF ITEMS DELETED

(a) *Obsolete.* Posts, camps, stations, and depots in zone of interior will take action as authorized by paragraph 3, section I, War Department Circular 34, 5 February 1946. Oversea commands will dispose of obsolete items as contemplated by section IV, WD Circular 333, 1945.

(b) *Delete.* All quantities on hand in warehouse; if serviceable, will be disposed of as surplus as prescribed in WD Circular 34, 1946. Unserviceable stock, not worth repair, will be disposed of through the salvage officer as prescribed in WD Circular 35, 1946. Items in use may continue in service at depots or stations until they are consumed or become unserviceable. Minor repairs may be made if items are to be continued in use; if not to be continued in use, the items will be disposed of as surplus in the same manner as warehouse stock.

(c) *Storage and issue responsibility assigned to Quartermaster.* Stocks will be disposed of in accordance with instructions contained in section VII, WD Circular 179, 1945, and SB 10–242, regarding paper products, cleaning and preserving supplies, miscellaneous office supplies; and section VIII, WD Circular 293, 1945.
